

Congratulations to our students on another set of wonderful results!

Chew Valley School is celebrating success with its A Level and BTEC results yet again, marking the culmination of a great deal of hard work and witnessing significant achievements for the high performing Sixth Form. The diverse destinations of these wonderful students reinforce the aspirational nature of the school community, with almost 80% of university applicants being accepted by their first choice institution.

Gareth Beynon, Headteacher, said “We are delighted for our students and so proud of their achievements. These notable successes are testament to their hard work in the build up to the examinations. While it marks the end of our time working with this wonderful year group, these results have ensured the start of so many exciting opportunities for these remarkable people.”

Notable experiences this year include: Ellie Finn, who gained 3 A* grades in Biology, Chemistry and Maths, along with a further A for EPQ to secure a place to read Veterinary Medicine at the University of Nottingham; Hannah Vince whose A* grades in Psychology and Sociology and A grade in Spanish will see her attend the University of Birmingham in order to study Psychology; Hannah Cole, who achieved an A* in Spanish, as well as A grades in History and Maths, is beginning a course in Modern Languages at the University of Exeter; Archie Hamerton, with an A* in English Literature and A grades in History and Sociology, will study English at the University of Cambridge; Katie Riches, with an A* in Psychology and A grades in Biology and PE, will study Psychology at the University of Birmingham and Amelia Simpson, whose A* in Philosophy and Belief and A grades in English Literature and Sociology see her attending the same institution to study English.

With higher level apprenticeships also proving a popular alternative to university, special mention should be made of Sol Kuseri, who has secured a prestigious degree level Engineering apprenticeship with global company Airbus, and Lauren Whitcher who, with a double Distinction starred result in Information Technology and a Distinction in Business, has already embarked upon an apprenticeship with Wessex Water.
